**SecurTrac Ortho Bed Traction System**

Designed for use as an Orthopaedic Bed Traction System for Cervical, Lumbar and/or Leg Traction applications

**Features:**

- Adjustable Height
- Adjustable Width (Suits Standard and Bariatric Beds)
- Quick fit Bed Mount System
- Quick fit mounts for Height Adjustment
- Quick fit adjustment of Traction Pulley Head
- Quick adjustable/lock slide mechanism for traction device along horizontal plane

The SecurTrac Ortho Bed Traction System is a static traction device, for the purpose of applying a tensile force to create a distraction on body parts, e.g. cervical, leg or lumbar vertebrae. The SecurTrac attaches easily to most beds and allows both height adjustment and desired placement along the length of the slider bar. This device easily allows the direct placement of garment (Bucks Traction Boot) or other to a water weight bag.

Ideal for use with Buck’s Traction for the management of patients with femoral fractures pre and post operatively. (Pelvic or Cervical traction)

Maximum weight application is 40 lbs

Please refer to your Physician for a prescribed weight application to suit specific use.

**Note:** Not suitable for Halo Traction
